## **BIOGRAPHY**

Dr. Claire Taylor is a senior research scientist at the Institute for Energy Technology in Halden, Norway. Her primary research focus is Human Reliability Analysis for both the nuclear and petroleum domains.

Prior to moving to Norway, Claire worked for several years as a Human Factors Engineer in the UK nuclear industry, providing Human Factors and human reliability analysis support to nuclear safety cases, as well as conducting Human Factors assessments and providing input to event investigations at existing nuclear sites.

Claire has a background in accident investigation methods, with a PhD in this subject from University College Dublin.
