

PSAM12 Speaker Bio

The Role of NASA Safety Thresholds and Goals in Achieving Adequate Safety

Short Statement: I am one of the authors.

BIOGRAPHY

Mr. Everett is a risk analyst with twenty-eight years experience supporting a variety of government agencies and private-sector clients in the areas of space systems safety, nuclear weapons safety, and missile defense lethality analysis. He is currently working in the Energy & Space Division of Information Systems Laboratories (ISL), where he supports the National Aeronautics and Space Administration (NASA) in the development of system safety and risk management processes and guidance, the conduct of risk assessments, and the development of computer-based risk assessment tools.
