PSAM12 Speaker Bio

#48 – Trend analysis of input data to PSA

Short Statement: First author, speaker.

BIOGRAPHY

I am a M.Sc. in “Nuclear Engineering” with a bachelor degree in “Chemical engineering with applied physics” from Chalmers University of Technology in Gothenburg, Sweden. I am, since September 2013, employed at ÅF Consulting as a technical consultant in the nuclear field. During my employment I have worked with development of operability verification of process components, construction prerequisites for mechanical systems and various other projects.

Here at PSAM12 I will be presenting a paper based on my thesis work done at OKG power plant on the eastern coast of Sweden. Since my graduation I have returned to OKG as a consultant part-time, but have mostly been at the Ringhals power plant on the western coast.

Other merits and publications:

- Chairman of the board, Intize, www.intize.org, (2012-present)
